

quency electromagnetic technology to dramatically improve pipe joining and testing times, thereby increasing job site productivity. When using Triton, a 3/4" plastic pipe can be fused in approximately 40 seconds and welds are ready for pressure testing immediately. This increases job completion times while maximizing flow rates and offering a safer environment. Ask your wholesaler for info or call Watts Canada: 905-332-4090 www.TritonPipeFusion.com.

POCKET SIZE SPRINKLER HEAD SHUT-OFF TOOL

The Shutgun pocket-sized tool from Technical Craft Design shuts off activated sprinkler heads instantly, giving firemen and maintenance personnel the ability to minimize and prevent excessive water damage from activated fire sprinklers. It's the first product that uses a fusible link that will melt and release the tool if a fire rekindles. One-hand activation makes it safe and easy to use. Shutgun works to shut off most types of sprinkler heads including recessed styles that are popular in commercial complexes. Ask your wholesaler or call: 866-827-8711. www.technicalcraftdesign.com

VIRTUALLY SILENT VENTILATION FAN

Broan-NuTone introduced ULTRA™ Sense™ Technology and expanded its line of efficient ventilation fans equipped with brushless DC motors to include Humidity and Motion-sensing models. Single speed sensing models activate automatically when humidity is detected for a user-defined runtime up to 60 minutes. Multi-speed models automatically boost the fan from its continuous low-speed setting to high speed when motion or humidity is sensed for a user-defined time up to 60 minutes, and then return the fan to its continuous low-speed level. Virtually silent ventilation. Ask your wholesaler for info. www.BroanULTRA.ca

UEI TEST INSTRUMENTS CANADA
Refrigeration System Analyzer AK9 SC
Advanced Durable Analyzer for the Refrigeration Professional

DIGI COOL

- ✓ The new AK900SC offers a patented pressure bar graphs that intuitively displays pressure dynamics for quick diagnosis.
- ✓ Automatic saturation, subcooling and superheat readings. No more wallet cards.
- ✓ Integrated dual temperature probe to automatically calculate superheat, subcooling, and pressure extremes monitoring for simple pressure controls set-up.

DigiCool AK900SC is distributed by UEI Test Instruments. All rights Reserved.

The Right Equipment for All Your Needs

Supco www.supco.com

- Digital Micron Gauge with Separate Wireless Belt Clip Remote Alarm when Preset Microns are Attained VG640**
 Guards system service activity and provides notification when alarm thresholds are reached.
- Mini Temperature/Humidity Data Logger SL500TH**
 LCD Real Time Graphical & Text Display, Visual Alarms, Software & USB Included
- Dual Digital Manometer DDM55**
 Dual Input, Range: +/-55" H2O, Resolution to 0.01". Hoses, fitting and case included, backlit LCD
- Temperature Alarm with Digital Display & Remote Wireless Alarm TA44**
 Single-set temperature alarm provides reliable protection for temperature sensitive areas.
- Telescopic Flashlight FT3M**
 Multi-function device including: three super bright LED lights with a handy on/off button, powerful magnet on grip handle and light tip, and adjustable, removable mirror.

High Quality Instrumentation Yet, Cost Effective
